Periodic Inspections and Maintenance of DNVGL Certification for Offshore Containers

DNV 2.7-1 section 2.5 states that to maintain the validity of an offshore container certificate, the container shall be inspected annually as described in section 9 of the standard.

It also states that such inspections may be carried out by DNVGL or by other inspection bodies, who should normally meet the requirements for Type-B inspection bodies, as per ISO/IEC 17020 or equivalent standards.

We refer to:

- UKAS Schedule of accreditation (referring to the "Inspection Team of Perfection Services Ltd"), issue 001, dated 9th November 2015, confirming Type-C inspection body status.
- DNVGL Audit / Survey Report (ref 20170407) dated 7th April 2017, referring to ISO/IEC 17020 conformity assessment audit, undertaken by Curtis Barry at PSL on 16th March 2017.

From the information provided and the audit undertaken, we confirm that, based on the current organisational structure, the Inspection Team operating within PSL demonstrates sufficient independence from PSL Services (Rental), in terms of technical decision making, manufacturing, reporting and financial matters.

We consider this an equivalent and acceptable solution, that satisfies the intent of DNV 2.7-1 section 2.5, in terms of meeting the requirements for a Type-B inspection body.

Sincerely
for DNV GL UK Ltd.
