

HSE Quality Statement - Inspection

The PSL Inspection Body aspires to be a world leader in the provision of Inspection Services, and we are committed to achieving our mission in a professional and ethically sound manner.

Our Vision - "Being the Accredited Pioneer in the Inspections Industry"

Our Mission - "To strengthen our foundation by expanding our services while creating awareness through sustainable development with future growth in mind while exceeding the expectation of our stakeholders"

The growth and sustainable development of the PSL Inspection Body is built on our core values: Safety and Responsibility, Integrity and Impartiality, Innovation and Improvement, Customer Satisfaction and Accredited Service (UKAS) which will set us apart from other Inspection companies to change how things are done in the industry. These values are the guiding principles which require us to act and think differently and drive us to become the brand of choice.

PSL Inspection Body commits to our overall objective to consistently provide customer value and satisfaction in the service we provide using suitably qualified staff, world-class leadership, continual improvement and employee development, all within the framework of the ISO/IEC 17020 Standard.

The integration of safety, quality, service and technical excellence into all aspects of our operations is achieved through the Accredited Service to the ISO/IEC 17020 Standard and stringent adherence to our company HSE Management System. We operate with integrity and independence and are resolute in conducting certification and inspection activities in conformity with applicable International Standards and the requirements of Regulatory Authorities.

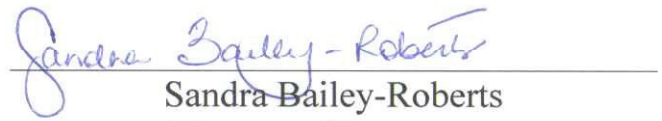

The Board of Directors, Senior Management and staff of PSL Inspection Body commit to minimizing the potential Health, Safety and Environmental risks to all stakeholders by:

- ❖ Committing to undertake our operations with a view to minimize potential Health, Safety and Environmental risk to all stakeholders
- ❖ Ensuring that its entire staff is given sufficient training and development support to ensure competency for their area of work through education, training and experience, where appropriate
- ❖ Identifying and evaluating all HSE hazards and the management of the related risks to acceptable levels decided by the organization
- ❖ Provision of safe working conditions, equipment and safe handling and transport of harmful substances
- ❖ Compliance with all company policies and applicable HSE legislation and reviewing all said policies at least once annually
- ❖ Prevention of accidents, injuries and pollution or harm to the environment and implementation of adequate emergency response procedures for all foreseeable situations
- ❖ Planning and establishing measurable objectives based on its HSE Quality Policy for the ongoing development of the company and its customers. These objectives are regularly reviewed and measured by Management.
